

Night Fishman A rod And reel holder

1. This is a rod and reel holder ,that is constructed out of 7/16 inch steel , It is 3 ft. long , and is 1 ¼ inch wide.
2. This Rod and Reel holder has a 2 inch piece of pipe on one end , that Rod and reel is inserted into.
3. On the other end of this rod and reel holder , there is a long piece of steel , that is spiked for easy insertion into the ground , this is what holds the Night Fishman in place , While you are fishing.
4. On top of the Night Fishman Rod and Reel holder is a 12 volt running light, and a buzzer, these are both mounted to steel, and are powered by a 9 volt battery.
5. The 9 volt battery sits in a holder, that locks battery into place..This holder is mounted on the underneath side of Night fish man, and sits under light and buzzer.
6. This Rod and Reel holder has 2 wires, one wire connects to the ground on the battery holder, and the other wire which is the hot wire, connects to a bolt that goes through a plastic bushing, So it will make contact with another bolt, when fish bite, this makes light and buzzer react, and alerts you to check line.
